

Glycemia Risk Index Survey

Evaluating Certified Diabetes Care and Education Specialists’ and Other Health Care Professionals’ Feedback on GRI

May | 2025

What’s Involved

Researchers from the Florida State University College of Nursing and the Diabetes Technology Society are seeking adult Certified Diabetes Care and Education Specialists (CDCESs) and other Health Care Professionals (HCPs) who manage people living with diabetes.

This research study aims to evaluate the Glycemia Risk Index (GRI) as a tool to support more effective diabetes management. Specifically, we’re exploring how CDCESs and other HCPs use the GRI, alongside AGP reports, to guide clinical decisions and interventions.

Participation Details

Participation involves a 1-hour interactive online educational session about GRI, followed by a brief survey. **Online Session Date & Time: Monday, June 9th | 11:00 AM – 12:00 PM (Pacific Time).** As a token of appreciation for your time and insights, you will receive a \$30 USD Amazon gift card upon completion of the session and survey. Your expertise can help shape the future of diabetes care!

Related Article: A Glycemia Risk Index (GRI) of hypoglycemia and Hyperglycemia for Continuous Glucose Monitoring Validated By Clinician Ratings

Glycemia Risk Index (GRI), a single metric designed to quantify both hypoglycemia and hyperglycemia risk from continuous glucose monitoring data, shows strong correlation with clinician-assigned risk ratings.
